## **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 2, H225 Acute Tox. 4, H332 Skin Irrit. 2, H315 Eye Dam. 1, H318 STOT SE 3, H335 STOT SE 3, H336 STOT RE 2, H373

. -

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

#### SUB codes represent substances without registered CAS Numbers.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Eye contact                | : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.                                                                                                                                                                                                                               |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Inhalation                 | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul>                                                                                                                                                                          |
| Skin contact               | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>                                                                                                                                                                                                                          |
| Ingestion                  | : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.                                                                                                                                                                                                                                                              |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health    | effects                                                                                                                                                                                   |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eye contact               | : Causes serious eve damage.                                                                                                                                                              |
| Inhalation                | : Harmful if inhaled. Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.                                             |
| Skin contact              | : Causes skin irritation. Defatting to the skin.                                                                                                                                          |
| Ingestion                 | : Can cause central nervous system (CNS) depression.                                                                                                                                      |
| Over-exposure signs/s     | <u>symptoms</u>                                                                                                                                                                           |
| Eye contact               | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness                                                                                                              |
| Inhalation                | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| Skin contact              | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur                                                             |
| Ingestion                 | : Adverse symptoms may include the following:<br>stomach pains                                                                                                                            |
| 4.3 Indication of any imi | mediate medical attention and special treatment needed                                                                                                                                    |
| Notes to physician        | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>                                         |
| Specific treatments       | : No specific treatment.                                                                                                                                                                  |

| THINNER 91 | -82 (AMERCOAT T-10 THINNER) |                                |                   |

## **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media<br>Suitable extinguishing<br>media | :  | Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.                                                                                                                                                                                                                                                                                          |
|------------------------------------------------------------|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Unsuitable extinguishing media                             | :  | Do not use water jet.                                                                                                                                                                                                                                                                                                                                   |
| 5.2 Special hazards arising fro                            | om | the substance or mixture                                                                                                                                                                                                                                                                                                                                |
| Hazards from the substance or mixture                      | :  | Highly flammable liquid and vapour. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. Runoff to sewer may create fire or explosion hazard.                                                                                                                                   |
| Hazardous combustion<br>products                           | :  | Decomposition products may include the following materials: carbon oxides                                                                                                                                                                                                                                                                               |
| 5.3 Advice for firefighters                                |    |                                                                                                                                                                                                                                                                                                                                                         |
| Special precautions for fire-<br>fighters                  | :  | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.                                      |
| Special protective<br>equipment for fire-fighters          | :  | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

# **SECTION 6: Accidental release measures**

contractor.

| 6.1 Personal precautions, pro  | tective equipment and emergency procedures                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapour or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate.<br>Put on appropriate personal protective equipment. |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".                                                                                                                                                                                                                                                                                   |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).                                                                                                                                                                                                                                                                       |
| 6.3 Methods and material for   | containment and cleaning up                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble.<br>Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal                                                                                                                                                   |

| (····)                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Code : 00291689<br>THINNER 91-82 (AMERCO | Date of issue/Date of revision : 5 December 2016<br>AT T-10 THINNER)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| SECTION 6: Accid                         | ental release measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Large spill                              | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections          | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

See Section 13 for additional waste treatment information.

#### 7.1 Precautions for safe handling

| Protective measures                                                    | : Put on appropriate personal protective equipment (see Section 8). Eating, drinking<br>and smoking should be prohibited in areas where this material is handled, stored and<br>processed. Workers should wash hands and face before eating, drinking and<br>smoking. Remove contaminated clothing and protective equipment before entering<br>eating areas. Do not get in eyes or on skin or clothing. Do not ingest. Avoid<br>breathing vapour or mist. Use only with adequate ventilation. Wear appropriate<br>respirator when ventilation is inadequate. Do not enter storage areas and confined<br>spaces unless adequately ventilated. Keep in the original container or an approved<br>alternative made from a compatible material, kept tightly closed when not in use.<br>Store and use away from heat, sparks, open flame or any other ignition source. Use<br>explosion-proof electrical (ventilating, lighting and material handling) equipment. Use<br>non-sparking tools. Take precautionary measures against electrostatic discharges.<br>To avoid fire or explosion, dissipate static electricity during transfer by earthing and<br>bonding containers and equipment before transferring material. Empty containers<br>retain product residue and can be hazardous. Do not reuse container. |
|------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Advice on general<br>occupational hygiene                              | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Storage temperature: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 7.3 Specific end use(s)                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| 8.2 Exposure controls<br>Appropriate engineering<br>controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Hygiene measures                                             | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Eye/face protection                                          | : Chemical splash goggles and face shield.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Skin protection                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Hand protection                                              | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately estimated.<br>When prolonged or frequently repeated contact may occur, a glove with a protection<br>class of 6 (breakthrough time greater than 480 minutes according to EN 374) is<br>recommended. When only brief contact is expected, a glove with a protection class<br>of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is<br>recommended. |
| Gloves                                                       | : For prolonged or repeated handling, use the following type of gloves:<br>Recommended: polyvinyl alcohol (PVA), Viton®                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                                                              | Not recommended: nitrile rubber                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Body protection                                              | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. Refer to<br>European Standard EN 1149 for further information on material and design<br>requirements and test methods.                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Other skin protection                                        | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Respiratory protection                                       | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Filter type: organic vapour (Type A) and particulate filter P3                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Environmental exposure controls                              | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| SECTION 10: Stability and reactivit                      | у                              |                   |

**10.5 Incompatible materials** : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.

| 10.6 Hazardous         | 1 | Depending on conditions, decomposition products may include the following |
|------------------------|---|---------------------------------------------------------------------------|
| decomposition products |   | materials: carbon oxides                                                  |

# **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

#### Acute toxicity

| Product/ingredient name | Result                 | Species | Dose                    | Exposure |
|-------------------------|------------------------|---------|-------------------------|----------|
| 2-methylpropan-1-ol     | LC50 Inhalation Vapour | Rat     | 6500 mg/m <sup>3</sup>  | 4 hours  |
|                         | LD50 Dermal            | Rabbit  | 2 g/kg                  | -        |
|                         | LD50 Oral              | Rat     | 2460 mg/kg              | -        |
| xylene                  | LC50 Inhalation Gas.   | Rat     | 6670 ppm                | 4 hours  |
| -                       | LC50 Inhalation Vapour | Rat     | 5000 ppm                | 4 hours  |
|                         | LD50 Dermal            | Rabbit  | >1.7 g/kg               | -        |
|                         | LD50 Oral              | Rat     | 4.3 g/kg                | -        |
| 4-methylpentan-2-one    | LC50 Inhalation Vapour | Rat     | 32772 mg/m <sup>3</sup> | 4 hours  |
|                         | LD50 Oral              | Rat     | 2.08 g/kg               | -        |
| ethylbenzene            | LC50 Inhalation Vapour | Rat     | 4000 ppm                | 4 hours  |
| -                       | LD50 Dermal            | Rabbit  | 17.8 g/kg               | -        |
|                         | LD50 Oral              | Rat     | 3.5 g/kg                | -        |
| toluene                 | LC50 Inhalation Vapour | Rat     | 49 g/m <sup>3</sup>     | 4 hours  |
|                         | LC50 Inhalation Vapour | Rat     | 8000 ppm                | 4 hours  |
|                         | LD50 Dermal            | Rabbit  | 8.39 g/kg               | -        |
|                         | LD50 Oral              | Rat     | 636 mg/kg               | -        |

**Conclusion/Summary** : Not available.

Acute toxicity estimates

| Route                | ATE value    |  |  |
|----------------------|--------------|--|--|
| Dermal               | 3237.6 mg/kg |  |  |
| Inhalation (vapours) | 18.36 mg/l   |  |  |

#### Irritation/Corrosion

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapour concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

#### Additional information

| ADR/RID     | : None identified. |
|-------------|--------------------|
| Tunnel code | : (D/E)            |
| ADN         | : None identified. |
| IMDG        | : None identified. |
| IATA        | : None identified. |

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

# **SECTION 15: Regulatory information**

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture <u>EU Regulation (EC) No. 1907/2006 (REACH)</u>

Annex XIV - List of substances subject to authorisation

Annex XIV

None of the components are listed.

Substances of very high concern

None of the components are listed.

| Code              | : 00291689                  | Date of issue/Date of revision | : 5 December 2016 |
|-------------------|-----------------------------|--------------------------------|-------------------|
| <b>THINNER 91</b> | -82 (AMERCOAT T-10 THINNER) |                                |                   |

### **SECTION 15: Regulatory information**

Annex XVII - Restrictions : Not applicable. on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

#### Other EU regulations

| Product/ingredient name | Carcinogenic<br>effects | Mutagenic effects | Developmental<br>effects         | Fertility effects |
